NYT v. Microsoft & OpenAI: Debrief

Use after discussion. These takeaways explain the reasoning; compare them with your original decision.

Financial Lead — Key Takeaways

- Capital comes with terms. Identify the decision rights, dependencies and financial obligations attached to your proposed funding source.
- Use all three corners. Explain how the proposal affects control, access to capital and exposure, including the questions the packet leaves unresolved.
- Test the arrangement under disagreement. Identify who could refuse a proposed action and what would happen if the partners wanted different things.

Marketing Lead — Key Takeaways

- Promises and governance must be examined together. Identify what the proposed statement commits the organization to and who has authority to deliver it.
- Distinguish the documents. Compare public messaging, governance arrangements and the purposes described in the packet without treating them as interchangeable.
- Plan for change. Explain how the team would review its statements when its funding, structure or activities change.

Operation Lead — Key Takeaways

- Inputs carry terms as well as costs. Identify what your proposed approach requires the company to know about an input and its permitted uses.
- Compare the tradeoffs. Explain how each relevant cost, restriction and uncertainty affects control, capital and exposure under your proposal.
- Separate the claim from the outcome. Distinguish the complaint's allegations and requested relief from what has been established in the supplied material.

Tech Lead — Key Takeaways

- Control has a practical meaning. Map who designs, operates, monitors and can stop the system, then compare those roles with the agreements.
- Assess the chosen boundary. Explain how your proposal changes capability, dependence and responsibility between the partners.
- Specify evidence and escalation. Identify what information a decision-maker needs and who acts when the partnership encounters a disputed input or use.

Account Manager — Key Takeaways

- Explain how capital, control, and responsibility fit together; an organization chart alone is not an argument.
- Different rankings can be defensible. Connect the priorities to evidence and the weekly concept.
- Example allocation: 40/30/20/10 totals 100. Explain your own allocation; priority points are not course-grade points.

Key takeaway

- Use the Structure Trilemma to examine the arrangements in the case: who funds, who decides and who faces which consequences. Support the analysis with the supplied complaint while keeping allegations and legal outcomes distinct.
- Which rights and responsibilities would your arrangement create in practice?

Apply to your venture

Draw your venture's proposed ownership and decision structure. Name who approves a major spending decision, who reviews input permissions, and one trade-off in the structure.

Output: A governance sketch and justification for Midterm Section D.

Feedback check

Identify one evidence-backed strength in your explanation and one specific revision. Save the record and use the reflection guide.
