Snowflake: Debrief

Use after discussion. These takeaways explain the reasoning; compare them with your original decision.

Financial Lead — Key Takeaways

- Connect spending to the pricing model. Explain how the proposed allocation affects customer value, the cost to serve and the company's ability to capture revenue.
- Distinguish the financial measures. Compare operating results, cash flow and compensation costs before drawing a conclusion about capacity to invest.
- State the long-term tradeoff. Identify what the choice funds or sacrifices and what evidence would make you revisit it.

Marketing Lead — Key Takeaways

- Expansion requires a behavioral explanation. State what customers would do differently under the proposed sales plan and how that affects the invoice.
- Separate the measures. Explain what retention, customer counts and commitments reveal about demand, and what they do not establish.
- Consider the fences. Identify which customer groups receive different value and how the proposal responds to those differences.

Operation Lead — Key Takeaways

- Efficiency changes the relationship between work and billing. Trace what happens to resources consumed, customer value and revenue under the proposed plan.
- Test the response over time. Explain what customers might do with released capacity or budget and what evidence would support that expectation.
- Locate the choice in the triangle. Identify whether the proposal changes the metric, level, fences or the work being delivered.

Tech Lead — Key Takeaways

- The roadmap and the meter interact. Explain how the proposed capability changes customer value, measured usage and operating cost.
- Compare alternatives from the customer's perspective. Identify the workflow each approach supports and the reasons a customer would choose it.
- Define a test of the investment. State how you would assess adoption and revenue effects without treating every increase in activity as equal value.

Account Manager — Key Takeaways

- Connect pricing to customer value, usage behavior, and the cost of sustainable growth.
- Different rankings can be defensible. Connect the priorities to evidence and the weekly concept.
- Example allocation: 40/30/20/10 totals 100. Explain your own allocation; priority points are not course-grade points.

Key takeaway

- Return to the coffee price: per what, at what level, and for which customers? Use the Value-Metric Triangle to explain how the team's choices affect customer behavior, delivered value and revenue.
- What happens to the invoice when the customer gets better at using the product?

Apply to your venture

Compare two pricing models for your venture. Calculate the customer bill at low and high usage, identify a cost assumption, and justify one model.

Output: A pricing comparison and recommendation for Final Section D.

Feedback check

Identify one evidence-backed strength in your explanation and one specific revision. Save the record and use the reflection guide.
